

Interest Maintained
in Scout ActivitiesGeneral Meeting Decides to Hold
Jamboree in Spring—Scout-
masters to Arrange Program

A general meeting of the Boy Scout troop committees of the Crow's Nest Pass was held in the office of J. E. Gillis, Blairmore, on Monday evening. H. G. Westup presided with Mr. Gillis as secretary.

A report was submitted by Rev. A. S. Partington of the work accomplished towards organization by the committee appointed for that purpose. This recommends that a district be formed to include all towns from Pincher Creek west to Michel, and that a district commissioner be appointed.

The report was dealt with clause by clause, and with a few amendments, was adopted, with a vote of thanks to the committee.

Concerning the proposed Jamboree, it was decided to hold this in the spring or early summer of 1932, and preparations will be made during the winter and work carried out on a definite plan to be outlined by the Scoutmasters of the various troops. The proceeds of the Jamboree will be used in purchasing tents and other camp equipment, to avoid the expense of hiring from the military stores.

The financial report of the summer camp was read and showed all accounts paid, each troop being assessed on a per-capita basis. The total expense of the camp reached nearly \$400.

At present, the Troop Committees of Bellevue, Hillcrest and Blairmore. It was suggested by the committee that one troop be formed of Bellevue and Hillcrest, but after discussion it was decided to make no change until there are more Scouts to enable separate troops to be organized.

Local Mines Big Capacity

Figures in a directory published in August issue of Western Canada Coal Review, give the capacity output of the mines at Coleman, Blairmore and Bellevue as 11,000 tons, and Crow's Nest Pass, (Fernie, Coal Creek and Michel) at 4,000. It takes big orders to keep this group of mines working even half time.

In the Estevan-Bienfait area the total capacity of nine companies, including the Truxar-Traxer stripping mine, is 6260 tons of low grade lignite. Truxar-Traxer claims a capacity of 1500 tons daily.

The three mines of western Canada which the directory credits with a capacity of 3000 tons daily are Brazeau Collieries, Nordegg; International Co. and McGillivray Co.

A. F. Cady, salesman for McGillivray Co., with his headquarters in Winnipeg, occupies the limelight with a half tone photograph in the August issue of The Review. It states he has been connected with the coal industry in Canada and the United States for well over 20 years.

Supplementary Exams.

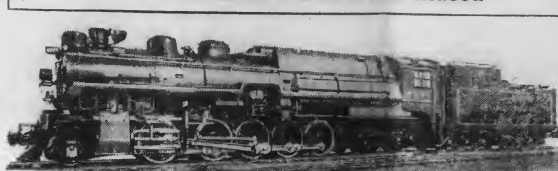

The following students were successful at the Departmental (supplementary) examinations held here in August and September:

Geometry 2—Margaret Nielsen, Dilys Brown, Audrey Dunlop, Alwyn Hayson.

Algebra 2—Rudolph Kwasney. History 3—Earle Bowen, Maida Bowen.

Algebra 3, Trigonometry, and Composition 4, Emma Antel passed in the three subjects.

Newest Locomotive is Monster Indeed

The largest and most powerful locomotive of its kind in the world has just been completed in the Angus Shops of the Canadian Pacific Railway, Montreal, for service in the Rocky Mountains. The new "8000" locomotive represents a new era in the advancement of steam motive power of greater efficiency and higher sustained capacity. It is called a "multi-pressure" engine because it generates its steam in three separate portions and at three different pressures and because of its radical departures in boiler design, is creating something of a furor in mechanical and railroad circles.

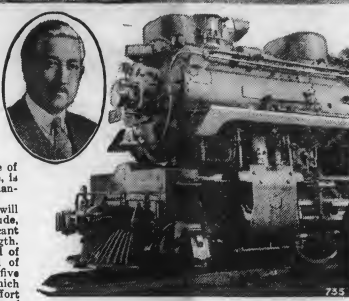

Facts and figures of the "8000" will give some indication of its magnitude, efficiency and strength. It is only a scant nine inches short of 100 feet in length. Weight of engine is 485,000 lbs. and of tender 300,000 lbs., making a total of 785,000 lbs., or 392½ tons. It has five driving wheels on each side, each of which is 63 inches in diameter. Its tractive effort is 90,000 lbs., which means that on a level track it will haul a freight train, over a mile in length, made up of one hundred and fifty 40-ton cars and its tender has a capacity of 12,000 gallons of water and 450 gallons of fuel oil enabling it to make long hauls without replenishing. There are 8,595 feet or slightly over three and a half miles of seamless steel tubes used in the construction of the boiler units alone.

An outstanding feature of the "8000" is the firebox unit which is a closed circuit in which 300 gallons of distilled water are continually circulating without loss by evaporation. Distilled water is used because it prevents accumulation of sludge and scale so common in water tube boilers. The closed circuit or firebox unit extends into the high-pressure boiler drum in the form of 16 coils, called heat transfer coils.

There are three locomotives of this type in Europe and they show excellent savings in fuel, ranging from 25 to 35 per cent, as compared with the conventional type of locomotive. But the largest of the European locomotives of this type is only 42 per cent of the weight and develops only 38 per cent of the power of the "8000." It will be used in the Rocky Mountain territory of the company.

H. B. Bowen (inset) Chief of Motive Power and Rolling Stock, Canadian Pacific Railway, working in co-operation with the American Locomotive Company and the Superheater Company, of New York, designed the "8000" after he had made a special trip to Europe in 1929 to study locomotive types and development. The construction of this monster locomotive was handled under direct supervision of Mr. J. Burns, Works Manager, Angus Shops, and Mr. T. Donald, of Mr. Bowen's staff.

Lay-out shows full length view of the "8000" from end view; and, inset, Mr. Bowen, designer of the locomotive.

Rod and Gun Club

The club held their competition at the North Fork on Sunday, Sept. 20th, and the prizes were awarded to the following:

- 1st prize, biggest basket, E. W. Beart.
- 2nd prize, biggest basket, Robt. Jenkins.
- 3rd prize, mixed basket, H. Claus.
- 4th prize, biggest speckled, R. Penman.
- 5th prize, biggest grayling, J. Kovack.

On the Wrong Road Early in Life

A youth giving his name as Burrows was picked up by Constable Houghton last Saturday morning, after being seen picking locks of garages at the rear of J. A. McDonald's house. When arrested he threw away some keys and a nail which had been used in entering premises. Investigation proved that he already had a jail record, which was added to by Magistrate Gresham giving him two months in Lethbridge jail.

Theft of Axes

On the suspicion that some of the freighters employed to fight the forest fires had stolen axes belonging to the forestry department of the provincial government, the truck was searched by the A. P. P. when it arrived at Coleman. As a result, two men were arrested and each was given two months suspended sentence and ordered to pay the costs of the court or 30 days in default.

Procrastination is the thief of time—and money. Many put off till tomorrow that which should be done today. Particularly is this the case in fixing up for winter. Storm doors and windows will be required. J. S. D'Appolonia makes special prices to early buyers. You can save on material and work by buying NOW!

Exchange Rates Upset

We went to the bank on Tuesday and asked how much it would cost in Canadian money to remit to Great Britain equivalent in pounds sterling. The bank had instructions not to quote any rates till further notice. 'Tis not often that a bank refuses to take your money. The reason is that exchange rates are so unstable during the present financial crisis in Great Britain that Canadian banks are taking no chances of losing money on making remittances to other countries.

Address This Evening

"How Life Begins" is the title of an illustrated address to be given in the United Church this evening at 8 p.m., under the direction of the public health department of the provincial government. The address has been arranged by Principal Hoyle, and it will be delivered by Mr. Cook, of Edmonton. Parents and friends of students are invited to attend. There is no charge, the address being to promote health standards.

ST. ALBAN'S CHURCH

Next Sunday is the 17th after Trinity, the service will be: 11 a.m. Morning Prayer and address. 2:30 p.m. Sunday School. The Harvest Thanksgiving Service will be held on October 4th.

Mr. G. R. Powell is on the sick list this week.

Re Milk Delivery—Important

After October 9, I give notice to my customers that milk will not be delivered in West Coleman.—Joe Filafilo, Coleman Dairy.

NOTICE

The Ladies Auxiliary of St. Paul's United Church will hold their annual bazaar on Saturday, November 7, from 3 to 6 p.m. Tea will be served. Everyone welcome. Remember the date.

Communist Speaker
Addressed Meeting

Tom Ewen, national secretary of the Workers Unity League, addressed a meeting in the K. of P. hall on Monday night, his subject being on the attack on the Communist party, and what it means to the workers.

He stated the object of his campaign was to secure 10,000 new members for the Canadian Labor Defence League, and to raise money for the defence of the Communist leaders who were arrested in July and who are to face trial at a date to be fixed. Ewen is one of the men who are at present awaiting trial. He denounced the methods employed to raid the Communist party's offices and the arrests of the leaders.

The meeting was presided over by Andrew Dow, president of the local branch of the Workers Unity League, with which the local of the M. W. U. of C. is affiliated.

A collection was taken up amounting to \$7.05.

A Good Fisherman

Walter Bobbitt tells an interesting fish story. It happened many years ago, soon after he arrived here from Pennsylvania. Someone told him there was good fishing in the river near the International dam on the Old Man river, and he went to a very good catch—so good, says Walter, that I carried them home in a sack, trying to conceal the fact I had caught so many. I dumped them on the kitchen floor of my landlady's home, and invited a number of friends to have a nice feed of fish. It was not till later that we discovered they were all suckers, but they were mighty good eating at that, stated Walter.

United Church

Sunday, 11 a.m., Rally Day. Sunday school scholars are asked to attend, and parents and friends are asked to make a special effort to be present. Trail Rangers crests and badges will be presented at the morning service.

Commencing Oct. 4, Sunday school will meet at 2:30 p.m. Prayer meeting every Wednesday evening at 7 p.m. for one hour. Happy, inspirational Sunday evening gatherings at 7 o'clock are being planned. Assisted by stringed instruments and the senior choir, the congregation will sing familiar gospel hymns and the minister will preach evangelistic messages. A young men's quartette will be a special feature at some of the evening meetings. The members are George Hilbert, Reuben Johnson, James Cousens and A. E. Larke.

Mission Band will meet on Tuesday evening at 6:30 o'clock.

Harvest Festival Services

Special appeal is being made to members of St. Luke's, Blairmore, and St. Alban's, Coleman, for the harvest festival services, to be held on Sept. 27 and Oct. 4 respectively. All members of the Church of England are asked to give as generously as possible towards the funds of the church as a tribute of thanksgiving.

A car in which were two young men and two young ladies, from Pincher Creek, went into the ditch near the McGillivray offices on Tuesday evening, and lodged against the mine snowdrifts. The windshield and one rear window were broken, and the right fender and running board badly damaged. The driver was badly cut on the hand and on the head, and one of the girls was also cut by broken glass. The party proceeded to Pincher Creek on the train at 10:40 p.m., and the car was hauled in by Chas. Chardon, of Coleman Service Garage.

Red Cross Society
Local CommitteeMeeting Called to Organize Com-
mittee to Deal With Applications
for Relief in Coleman

Believing there is a vital need for Red Cross activities, especially at present, the Alberta division of Canadian Red Cross Society has requested Mrs. A. W. H. McLeod to call a meeting, which will be held in the United church hall on Wednesday, Sept. 30, at 8 p.m.

The purpose is to organize a committee to deal with applications for aid from the Society, and to appoint also a general committee. During the epidemic of 1918-19, Mrs. McLeod states the Red Cross rendered invaluable assistance to many in Coleman, this should not be forgotten.

It is urged that as many as possible attend the meeting, and support those who are active in serving the needy through the Red Cross. There is always a call to service which should be responded to.

There are very few people whose handwriting can be quickly read. Everyone has a different style, whilst some handwriting would require a mind reader to decipher it. The annoyances caused by indifferent writing can be avoided by the use of a Remington portable typewriter, and every enterprising person, no matter what their occupation may be, will find it a pleasure to use a portable, while those to whom they write will enjoy reading their letters. The Journal office will be pleased to demonstrate the latest models, and invite those interested to try these machines.

The World's Grain Show

"Canada, 1930," a booklet published by the Dominion Bureau of Statistics at Ottawa, summarizes the value of production in Canada for 1927 as follows: Agriculture, 38.1 per cent; forestry, 8; fisheries, 1.3; trapping, 0.4; mining, 6.5; electric power, 2.7; construction, 8.2; custom and repair, 1.9; manufactures, 33.1 per cent.

These figures are significant. They show conclusively the paramount importance of the industry of agriculture.

This importance is accentuated by the fact that the conditions of manufacturing, which occupies second place, reflect almost immediately the conditions of agriculture. It is accentuated even to a greater degree when one comes to examine the manufacturing schedule of the same booklet. Among the twenty-five leading manufacturing industries of Canada, flour and grist mill products occupy second place; slaughtering and meat packing third; butter and cheese seventh; bread and bakery products fourteenth.

A glance at the export schedules discloses the further fact that wheat stands at the top of the list and wheat flour second.

It seems to be needless, therefore, to make an apology for stating that any activity which promises even a surer footing for Canada's greatest industry merits the attention and support of every Canadian.

Will the World's Grain Exhibition and Conference to take place at Regina next year bear any fruit from this point of view? Let us see.

In the first place, it is as it's name implies, an exhibition and a conference. Secondly, it is open for participation to all the world.

The exhibition may be conveniently divided into three parts—the competitive, the national, and the commercial exhibits.

The competitive exhibit consists of 19 kinds of field crop products, divided into 56 classes, embracing practically all kinds of grain and seed grown in the world. The total of cash prizes amounts to over \$200,000 and the individual prizes are greater than have been offered before, anywhere in the world, at any other exhibition of its kind.

The winning of these prizes, however, is not the real objective of the competitive exhibition. The stimulant for a better quality field product is infinitely more important. It's effect is already apparent. There is ample evidence of this. The demand for registered—better quality—seed in greater all over Canada than it has ever had before. One organization reports an increase of almost 100 per cent.

The national and commercial exhibits will tax the floor space of the immense new building to the utmost. Twenty-seven countries have already spoken for space and others will follow—50 are expected. A visit to these exhibits, occupying a frontage of over a mile and a half, will be an educational feature surpassed only by a trip around the world—a trip, by the way, which most of us are unable to enjoy.

The privilege to participate, either as a competitor in any or all the prize classes, as an exhibitor in the national or the commercial section, or as a mere visitor, is open, wide open to the great wide world. Conferences of technical and practical agriculturists from many countries will take place during every day from July 25 to August 6. The privilege to do with all phases of field crop production, from the preparation of the soil to the disposal of the product for food, fodder, shelter or clothing.

Then there are the competitions for juniors, the tours of Canada, and a dozen other features, a mere reference to which space will not permit.

This whole programme, although not complete at this time, already contains the names of a score of the world's best. Surely such a co-operation of brains as this will constitute an asset to agriculture the value of which no man has the temerity to estimate.

Even from a monetary point of view alone, if the final effect be to raise the value of Canada's agricultural asset of almost 2,000 millions of dollars to the extent of one hundredth of one per cent. annually, the money necessary to carry the project to success will be an exceedingly profitable business investment.

But the World's Grain Exhibition and Conference will do more than this. It will effectively advertise Canada to the rest of the world, give her an opportunity to take stock and ascertain her standing in field crop production, will stimulate her growers in the use of better seed, will clear away any false impressions in the minds of foreign buyers, will demonstrate to her growers the kind of competition that must be met in the markets of the world, will bring to our own country valuable ideas and experiences, and most important of all, it will take its place among the great events which have brought the nations of the world into closer communion and a little further along the bumpy and tortuous trail toward the fertile meadows of international peace.

Scientist Leaving Canada

Professor Of Toronto University Will Make Home In England

Professor John Cunningham McLennan, head of the Department of Physics at the University of Toronto, is leaving that institution shortly and will make his home in Surrey, England, according to members of the faculty.

Dr. McLennan is a scientist of international note. His work in connection with helium, which he was the first man to discover and produce in commercial quantities, made him world-famous. During the great war he was scientific adviser to the British admiralty.

Would Be Better

A pipeless organ has been invented which turns electricity into music. Many persons would probably be tired pleased at the invention of a device to turn some radio music so called, into useful electricity.

Suffered Severe, Painful Cramps In Her Stomach

Those terrible cramps in the stomach that double you up in pain and make you break out in a cold perspiration, may be stopped by a few doses of Dr. Fowler's Extract of Wild Strawberry.

Mrs. Lloyd Jones, 204 Argyle St., Halifax, N.S., writes:—"I have suffered greatly from severe and painful cramps in my stomach. I tried several remedies without result. One day a friend advised me to take Dr. Fowler's Extract of Wild Strawberry, so I bought a bottle and got instant relief."

Cut In British Dole

Variety Of Unemployed Men And Women Are Affected

The 10 per cent. cut in unemployment insurance benefits in Britain, commonly called the dole, will affect a variety of unemployed men and women alike, from the age of 16 to 65. At the same time those in employment are called upon to increase their weekly payments to the "dole fund" and employers' contributions are likewise increased, under the provisions of the national economy bill.

Hitherto youths of 18 have been entitled to \$2.50 a week, rising to \$4.25, according to age. The \$4.25 is the maximum for single men.

Unemployed girls from the age of 16 are entitled to \$1.25 a week, with a rising scale for intervening ages to \$2.10 when the allowance is \$3.75.

Additional benefits for dependents and children will not be affected by the reductions.

SAVED IMPORTED DRESS

"After a little wearing, a lovely green voile—an imported dress—lost colour so completely that it was not wearable. A friend who had admired it asked me why I wasn't wearing it any more. I turned out and she advised dyeing it and recommended Dian-d-d Dyes. To make a long story short, I turned out beautifully. I have a lovely new dress that really cost just 15c—the price of one package of Diamond Dyes."

"I have since used Diamond Dyes for both tinting and dyeing. They do either equally well. I am not an expert dyer but I never have a failure with Diamond Dyes. They are so easy to be made so they always go on smoothly and evenly. They never stop, streak or run, and I never know the things I dye with Diamond Dyes are redyed at all."

Mrs. R.F., Quebec.

A Satisfactory Experiment

Wigley Company Find Wheat Buying From Gun Sales Receipts

The experiment of the William Wigley Company in purchasing wheat in Canada with part of the receipts from gun sales in the Dominion has proved so satisfactory that it will be continued until December 1, at which time the experiment will be planned, and probably thereafter.

William Wigley, Jr., said the indirect business benefits counterbalanced temporary book losses in the purchased commodities, and that eventually there might be no real loss, but even a small profit.

Don't Submit To Asthma. If you suffer without hope of breaking the chains which bind you, not put off another day the purchase of Dr. J. C. Kellogg's Remedy. A trial will show you all doubt as to its efficiency. The sure relief that comes will convince you more than anything that can be written. Why suffer? Why suffer? This matches remedy is used by dealers everywhere.

Shortage Of Laying Hens

Unprecedented Movement Of Laying Hens From Farm To Market

An unprecedented movement of laying hens from farm to market is noted in a report of the Department of Agriculture which predicts a possible shortage if the traffic continues much longer at the present rate. The report points out that, "the remarkable feature of the situation as it affects the marketing of live hens is that in spite of the unprecedented volume of the moving all the receipts use of the moving quite readily into consumptive channels."

The Oil For The Farmer.—A bottle of Dr. Thomas' Electric Oil in the home will save many a journey for the doctor. It is not only good for the children when taken with colds and croup, and for the mother who suffers from pains and aches, but there are directions for its use on sick cattle. There should always be a bottle of it in the house.

A Natural Stimulant

Alcohol Is Normal Part Of Human Brain Says Expert

Can you think clearly with alcohol on the brain?

Everyone does, according to Dr. Alexander O. Gettler, noted New York toxicologist, who announced to the United Press his claims that alcohol is present in the brain and liver of every human being—whether drunk or of pure ethyl alcohol from the drop of pure ethyl alcohol from the brain of a man who never touched liquor in his life," Dr. Gettler said, "by employing a new method of multiple distillation without the use of condensers."

"Alcohol is a normal part of the brain, not only of persons, but of animals, as well. I have found it in dogs, pigs and other animals."

Asbestos is the only mineral that can be woven into fire-proof garments and molded into instruments impervious to flame.

Fishermen Are Now Helped By Science

Britain Has Fitted Up Small Laboratory On Board Trawler

Scientists now go to sea in a small fishing trawler and share the perils and discomforts of the fishermen in their efforts to ensure that the public's fleet of fish shall be perfectly fresh. The British Government's Fishery Research Station at Aberdeen has acquired the trawler "City of Edinburgh" and fitted up a small laboratory on board. Already methods whereby the period of freshness in which a fish can be extended from less than a week to about 10 or 12 days, without revolution of present methods of stowing fish in ice at sea, have been worked out.

The fishing fleet is being forced to go further and further afield for its catch, and, accordingly, many of the trawlers have to stay away for anything up to a fortnight. These results will be, therefore, of immense benefit to that typically British fisherman, the tough, weather-beaten North Sea fisherman who daily risks his life to provide the land-lubber with his favourite dish of "fish-and-chips"; but they are also valuable to all parts of the Empire where a fishing industry exists.

Recipes For This Week

(By Betty Barclay)

SOUTHERN POCKETBOOK ROLLS

2 cups special cake flour, sifted.
3 teaspoons baking powder.
1 teaspoon salt.
1 tablespoon shortening.
½ cup milk (about).
Sift flour once, measure, add baking powder and salt, and sift again. Cut in shortening. Add milk gradually until soft dough is formed. Knead lightly for 2 to 3 minutes. Roll to ¼ inch thickness. Cut with 2-inch flour-dusted cutter. Fold double and press down together lightly. Place in greased pan; brush tops with melted butter. Cover and let rise in warm place 20 minutes. Bake in hot oven (425 degrees Fahrenheit) 10 minutes. Again brush tops with melted butter and finish baking 5 minutes from oven. Brush tops with melted butter. Makes 16 small or 9 large pocketbook rolls. If a larger roll is desired, roll dough to ½ inch thickness and cut with 3-inch cutter.

SPICY CUCUMBER PICKLE

12 ripe cucumbers.
1½ cups sugar.
2 cups vinegar.
1 teaspoon salt.
1 tablespoon cloves, whole.
1 tablespoon allspice, whole.
2 tablespoons cinnamon bark.
1 tablespoon white mustard seed.
Cut the cucumbers in slices one inch thick.

Perlan Balm—there is nothing like it for creating and preserving a lovely complexion. Cooling, caressing—it soothes and dispels all roughness or chafes caused by weather conditions. Delicately fragrant, it adds exquisite charm to the most finished appearance. Dainty women inevitably choose Perlan Balm. A velvety smooth touch, it makes the skin rose-leaf in texture. Recommended also to soothe and whiten the hands. Truly a peerless toilet requisite for every woman.

Saskatchewan Dairy Industry.—Saskatchewan's dairy industry is expanding. The creamery butter production during July amounted to 2,805,316 pounds, an increase of 387,000 pounds over the output of July last year. The production for the first seven months of the year came to 11,437,673 pounds or 3,048,971 pounds more than for the similar period of 1930—a gain of 36.3 per cent.

Onions, potatoes, and tomatoes worth £10,000,000 were sent to England from Spain, France, and the Channel Islands last year.

Aching CORNS STOP HURTING

INSTANT RELIEF!

Just a drop or two of Putnam's Corn Extract will surely stop the pain. Removing corns with "Putnam's" is easy, sure, and painless—thousands say this wonderful remedy is the best. Don't suffer any longer. Putnam's Corn Extract, the one sure relief for corns. Sold at every drug store, 35c.

Canada's Finest Cigarette Tobacco

with ZIG-ZAG papers attached

Receiving Public Relief

Care Necessary To Prevent Dishonest Persons From Taking Advantage Of Relief Situation

Recently in the city of Hamilton a man was discovered who had been a regular recipient of relief from the city and who was paying monthly instalments on a radio, the purchase price of which was \$221. From the relief department he had received \$19 in cash, in addition to groceries, a half ton of coal and ten pairs of shoes. Also he had neglected to notify the relief officer that he had been working since June 30 and had drawn a pay cheque of some \$40. He was prosecuted, fined \$40, and required to return the \$19 cash he had obtained from the city.

The surprising thing about this case is not that a person of such peculiar mental twist was found to exist, but that he was discovered and prosecuted. His kind are operating under cover in every city and it is largely due to them that relief officials become more or less cynical and skeptical in their general dealings with indigents. The prosecution of this Hamilton sinner is certainly a step in the right direction.

Demands just now upon relief departments are extraordinarily heavy. While at no time is it legitimate for people to "work" relief departments, that offence is particularly objectionable at this time. In view of the fact that always there is someone trying to get away with it, the present would be a splendid occasion to discourage the habit by discovery and prosecution of those who persistently practice it.—Calgary Herald.

Final Stage Of Depression

Winter Will Be Hard But Better Times Are To Follow

"The coming winter is expected to be the final stage of the three years of depression through which Canada has been passing." These words, taken from a speech which E. W. Beatty, president of the Canadian Pacific Railway, made recently at Fredericton, N.B., will be accepted everywhere as reassuring. Mr. Beatty is in a position to speak on such matters as he has an inside knowledge of economic tendencies. There is no doubt that we are in for a hard winter, but if we can feel that it will mark the turn of the tide we can see it through with hope and confidence. The darkness is often deepest just before the dawn, and there are certainly many reasons for believing that the coming year will see Canada and the rest of the world once more on the upgrade towards normal trade and business conditions.—Toronto Mail and Empire.

Will Publish In Canada

Six American Magazines Will Now Be Printed Here

Publication of six magazines in Canada has been announced by McEwen Publications, and readers of the publications, numbering 200,000 in the Dominion, will obtain them at the same price as prevails today. The company has obtained a Dominion charter.

A statement issued by the publishers, says, in part: "By so doing, we not only feel that we can do our part in the promotion of the printing industry in Canada, but we also propose to promote our publications with the newspaper advertising with the knowledge we are building on a stable foundation."

The company has contracted for an advertising campaign covering every part of the Dominion.

Lady Caller: "Is the manager in?" Office Boy: "No. He just went to lunch with his wife."

Lady Caller: "I see. When he comes back with his stenographer, tell him his wife called."

The invention of a wind measuring instrument so sensitive that it will record a drop of wind pressure from eighty-five miles an hour to zero in one-hundredth of an inch, and a twentieth of a second, is announced.

A lot of folk think that beggins is an easy way of getting a living, but we'd like to see them try it for a couple of weeks. We have yet to envy a beggar.

Nevada excavations show that man was existent on the northern continent before the ice-age era.

Excessive Highway Building

Enlight British Engineer Says Trucking Most Expensive Way Of Moving Goods

"You have overspent yourselves," said Sir Alexander Gibb, British engineer, warning against excessive highway building in Canada in an address before the Empire Club of Toronto. With the exception of air transportation, highway trucking was the most expensive form of moving goods, when the subsidizing of highways was considered, he said.

"Some highways are justified when they are planned in connection with the present movement, and on it depends the development of your country more than anything else in the world."

"Transportation is one of the most urgent questions in Canada at the present moment, and on it depends the development of your country more than anything else in the world."

Many Placed On Farms

Fifteen Thousand Given Work Up To Middle Of September

The ranks of the unemployed have been depleted by 15,000 men who have been placed on farms in Canada, as the result of plans drawn up by the Minister of Immigration and Colonization, Hon. Wesley A. Gordon. The machinery of the soldiers' settlement board is co-operating with the Canadian National Railways and Canadian Pacific Railway in the work.

Up to the present 3,749 families and 10,609 single men have been placed by the Dominion on farms while the province of Ontario has similarly placed 800 families and 2,000 single men, and the province of Quebec 450 families and 300 single men.

Atomic Hydrogen

Produces The World's Hottest Welding Temperatures

The flames of atomic hydrogen, which produce the world's hottest welding temperatures within flames which are comparatively "cool," were demonstrated on a grand scale to the opening session of the American Physical Society.

The scientists watched men wearing goggles, gas masks and asbestos clothing manipulate the flames at the General Electric Company, demonstrating their enormous heat as the most effective means ever discovered for making perfect bright joints of metal.

The demonstration was part of an exhibit of results of the handiwork of the physicists.

Famous Jewel For Museum

The famous Canning jewel, which the Earl of Harewood sold at Sotheby's last year for \$50,000, has been presented to the Victoria and Albert Museum by "An American Friend" who desired to remove it from anonymous. The jewel dates from the 16th century and is traditionally supposed to have been sent by the Grand Duke of Tuscany to one of the Mogul Emperors.

Great Britain Finds It Is Necessary To Relinquish The Gold Standard

London, Eng.—Great Britain, faced by huge withdrawals of gold and falling prices in the exchange, will suspend the Gold Redemption Act, it was announced after a special cabinet meeting.

It was also announced that the Bank of England had raised its discount rate to six per cent. The rate has been 4½ per cent.

Pending passage of urgent legislation concerning the British financial situation, the Stock Exchange will be closed and provincial stock exchanges also have been asked by the London board to remain closed. It was emphasized, however, that there would be no interruption to ordinary banking business.

After the cabinet meeting a statement was issued from 10 Downing Street, residence of Prime Minister Ramsay MacDonald, as follows:

"His Majesty's Government have decided, after consideration with the Bank of England, that it has become necessary to suspend for the time being operation of the sub-section of the Gold Standard Act of 1925 which required the bank to sell gold at a fixed price.

"A bill for this purpose will be introduced immediately, and it is the intention of His Majesty's Government to ask Parliament to pass it through all its stages. In the meantime, the Bank of England has been authorized to proceed accordingly in anticipation of the action of Parliament.

"The reasons which led to this decision are as follows:

"Since the middle of July, funds amounting to more than £200,000,000 (approximately \$1,000,000,000) have been withdrawn from the London market. The withdrawals have been not partly from gold and foreign currency held by the Bank of England, partly from the sale of a certain £50,000,000 (\$250,000,000) which, shortly matures, secured by the Bank of England from New York and Paris, and partly from proceeds of French and American credits amounting to £50,000,000 (\$250,000,000) recently obtained by the Government.

"During the last few days, withdrawals of foreign balances have accelerated so sharply that His Majesty's Government felt it was bound to take the decision mentioned above.

"This decision will, of course, not affect obligations of His Majesty's Government or of the Bank of Eng-

land which are payable to foreign currencies.

"Gold holdings of the Bank of England amount to some £130,000,000 (\$650,000,000) and, having regard to contingencies which may be met, it is inadvisable to allow this reserve to be further reduced.

"There will be no interruption of ordinary banking business. Banks will be open as usual for the convenience of their customers and there is no reason why sterling transactions should be affected in any way.

Radio Development

Col. Steel Appointed To Staff Of Research Council

Ottawa, Ont.—Lieut.-Col. W. A. Steel, M.C., who has directed the radio development of the Department of National Defence, has been appointed to the staff of the National Research Council, it is announced. Starting October 1, he will have charge of the council's radio research programme.

Colonel Steel has had a distinguished career in both military and radio fields, he has represented Canada at numerous international radio conferences and he accompanied Premier R. B. Bennett to the last Imperial Conference.

"Radio research has been assigned a definite place in the plans of the National Research Laboratories, and many problems of a technical nature will be dealt with under the direction of Col. Steel.

Completing Plans For Bonus

Calgary, Alberta.—Arrangements for the payment of the five-cent Dominion Government bonus on wheat is nearing completion in Alberta. Office supplies and other equipment required in distributing the bonus have arrived at the Alberta wheat pool head office. They will be sent to pool elevator agents immediately, it was stated.

To Cut Fire Breaks

Victoria, B.C.—Work to the extent of 14,000 man-days will be created by the defence committee of the Provincial Government to proceed with the cutting of fire breaks and patrol lanes in six forest areas of the province. Approval to proceed with this scheme as part of the relief program of the province has been received from Ottawa.

Cut Land Taxes

Relief For Manitoba Agriculture Is Chief Motive

Winnipeg, Man.—Cutting almost \$400,000 from the land taxes for provincial revenue an order-in-council has been signed by Hon. J. D. McCreger, Lieutenant-Governor of Manitoba. The step is intended to relieve municipalities by giving them a larger share in revenues derived from land taxes.

The levies on the municipalities of \$300,000 for operation of the Child Welfare Act and \$90,000 for the Soldiers' Relief Taxation Act are wiped out. Although the land taxes for these purposes are abolished the government contemplates no curtailment in the services by which they have been collected. These will be financed out of the general revenues of the province.

Announcement of the wiping out of the taxes was first made by Premier John Bracken last week. He then suggested the money needed might be found by economies in administration, from the Natural Resources Reserve Fund, or from taxation elsewhere on those able to bear it.

Relief for agriculture was the chief motive of the change but it is also hoped it will have the effect of permitting lower rents in the city of Winnipeg.

As a measure of economy the government has already reduced the salaries of all provincial officials and civil servants from the premier down.

Canada and Brazil

Plan Trade Treaty

Negotiations Under Way and Decision Expected Shortly

Ottawa, Ont.—Canada and Brazil, it is reported, may shortly negotiate a trade treaty. No treaty on trade at present exists between the two countries.

The South American country, it is understood, is giving very serious and favourable consideration to the matter of changing its system of a single schedule of tariffs, applicable to all countries whose goods are admitted into Brazil, to a tariff method of preferred and non-preferred rates. With a number of Dominion products placed on the preferred tariff list of Brazil, Canada would likely admit some of the goods of that country under the intermediate schedule rather than the general tariff now applying to imports from Brazil.

Convict Taking Arts Course

University Work Sent To Youthful Long-Term In Portsmouth Prison

Kington, Ont.—For the first time in the history of Queen's University a convict in Portsmouth penitentiary, has made application to enter in arts course and do his studies extra-murally in prison. The applicant is a youthful long-term. In the past five years he has passed all Ontario departmental examinations for entrance to high school. The university work will be sent to him by the head of the extra-mural department at Queen's.

Might Solve Problem

New Westminster, B.C.—If the Dominion Government would withdraw from the income tax field and leave it to the provinces, provincial tax problems and to a great extent those of municipalities, would be solved, was the opinion of Robert English, deputy minister of municipal affairs in the Alberta Government, in a paper prepared by him and read to the Union of British Columbia Municipalities.

REPRESENTS CANADA

C. A. Bowman, Editor of the Ottawa Citizen, who is one of the Canadian delegates to the fourth biennial meeting of the Institute of Pacific Relations to be held at Hangchow, China, in October.

Proportional Vote Opposed

Manitoba Conservatives Object To Proposal Of Attorney-General

Winnipeg, Man.—Opposition to the principle of proportional representation contained in a suggestion by Hon. W. J. Major, Attorney-General, for a reduction in the number of seats in the Manitoba Legislature, was expressed on behalf of the Conservative party by Col. F. G. Taylor, leader of the group.

Col. Taylor said his party has no objection to the proposed reduction, but will use every legislative means to prevent the extension of the suggested proportional representation system to the rural areas of the province.

Mr. Major's suggestion would reduce the number of seats from 55 to 35 and would apply proportional representation to the whole province with the exception of four single-member constituencies.

Wheat Quality Is High

Equal If Not Better Than Any Previous Year

Winnipeg, Man.—The milling and baking quality of Canada's new wheat crop is exceptionally high and is equal, if not better, than that of any year tested by the Dominion Grain Research Laboratory it was announced.

The weight per bushel of the samples received to date and which have been examined under the direction of F. J. Birchard, are about the same as last year, with the yield of four comparing favourably. The protein content is much higher than the previous crop, while the gluten of different grades also is exceptionally good.

The baking quality is excellent, the report says, and the flour absorption is higher and the loaf volume greater.

Gandhi Makes Appeal

Asks British Labour Party's Support In India's Struggle

London, Eng.—Mahatma Gandhi stalked into the "Mother of Parliaments" and pleaded for the British Labour Party's support in India's struggle for independence. He had been invited to address Labour members of the House of Commons privately regarding India's claims.

He said his case was complete independence for India, the same as that enjoyed by Great Britain. He would accept no compromise, he said. Afterward he answered the questions of various Labour members.

Clash Between Chinese And Japanese Troops At Mukden Suburb

Count Only Preliminary

Further Returns From Recent Census Subject To Correction

Ottawa, Ont.—A further statement of population in a number of cities and towns of Canada which were not dealt with in previous announcements, has been issued by the Dominion Bureau of Statistics. The statement covers more particularly a number of towns, although it deals also with two or three cities in different provinces.

The figures issued show that the city of Quebec, increased from 301,193 in 1921, to 329,103 in the present year. The population of Windsor, Ont., has advanced from 38,591 to 62,957 in the ten-year period.

In western Canada, the city of Regina reported an increase from 34,432 to 53,034.

The largest percentage increase recorded in the statement is in the town of Riverside, Ont., which increased its population from 1,155 in 1921 to 4,426 in the present year. This is an increase of 283 per cent.

It is made clear in the statement that the count is a preliminary one and that returns are subject to correction as additions on account of closed houses and absentees have yet to be made.

Western Provinces

Holding Conference

Will Discuss Uniform Relief Plans At Meeting In Calgary

Victoria, B.C.—British Columbia was represented at the conference of western provinces at Calgary, October 19, Premier S. F. Tolmie stated following acceptance of the invitation, extended the government by Premier J. T. M. Anderson, of Saskatchewan. Representatives have not yet been chosen.

Premier Anderson indicated that matters to be considered by the conference would include curtailment of provincial services, reduction of expenditures, increase of revenues and uniform relief plans in the west.

International Peace Garden

Tract Of Land At North Dakota and Manitoba Border Is Selected

Asbury Park, N.J.—A tract of land on Turtle Mountain at the North Dakota-Manitoba border was approved by the National Association of Gardeners Convention as the site for the international peace garden.

Final decision on the adoption of this site will be made next spring at a joint meeting of the International Peace Garden Commission, and executive committees of the Canadian Association of Florists and Gardeners and the National Association of Gardeners.

Date and place of this meeting has not been determined.

Eskimos Feel Depression

Had Good Fur Catch But Prices Are Low

North Sidney, N.S.—Although apparently far removed from civilization, the natives of Canada's northern empire have not escaped the effects of the great business and industrial depression. The Eskimos reported to the "Beothic" crew that they had a bumper crop of fur-bearing animals and other northern products this season, but prices have fallen just about 50 per cent.

No Decision Reached

Ottawa, Ont.—Hon. H. A. Stewart, Minister of Public Works, said no decision had been reached concerning the abandonment of the Edmonton-Pouce Coupe telegraph line in northern Alberta. It was understood, however, that if the service is discontinued, the men working on the line will be absorbed into other branches of the government system.

Japs Retaliate

Sydney, Australia.—It was reported here that Japanese wool firms intend to transfer a portion of their wool buying from Australia to South Africa in retaliation for the recent changes in the Australian tariff on Japanese goods.

Important Speeches Made At League Assembly By Two Canadian Delegates

Geneva, Switzerland.—Committees of the assembly of the League of Nations heard eloquent and important speeches by two Canadian delegates.

Hon. Hugh Guthrie, Minister of Justice, and Senator C. P. Beaubien, of Montreal.

Mr. Guthrie spoke when the first committee of the assembly discussed the subject of bringing the league covenant against war into harmony with the Kellogg peace pact.

The general sentiment of the committee is so far in favour of acceptance of the proposed amendments in the covenant, which in the opinion of several speakers would tend to facilitate the work of next year's world disarmament conference, for they would leave no ambiguity or doubt that war is to be abolished as an instrument of national policy.

Acceptance of the conclusions reached last year, in favor of the proposed amendment, was advocated by Mr. Guthrie. He expressed strong opposition to any suggestion the matter should be adjourned.

Peiping, China.—After a three-hour artillery bombardment Japanese troops occupied Mukden, Manchuria, according to official despatches received here by Marshal Chang Hsueh-Liang, Governor of Manchuria.

The despatches declared that between 70 and 80 Chinese soldiers were killed in the unexpected attack.

A squad of Japanese soldiers appeared north of the Mukden military camp two hours before Friday night and opened rifle fire, the Manchurian Governor was informed. Shortly thereafter, according to the despatches, artillery bombardment started and shells fell in the Mukden arsenal from somewhere in the Japanese concession at the rate of about one a minute.

Chang Hsueh-Liang telegraphed orders from Peiping that all Chinese troops at Mukden deposit their arms in depots and make no resistance.

Tokyo, Japan.—Japanese and Chinese troops clashed last night at Peiping, suburb of Mukden, the Rengo News agency says, and in sharp fighting the Japanese captured the Peitaiyang district and drove the Chinese toward North Peitaiyang.

Sporadic fighting also was reported in other sections of Mukden on arrival of reinforcements, and severe fighting followed, it was reported.

Early this morning the Japanese had captured the Peitaiyang district and driven the Chinese northward.

An announcement was made by the Chinese to destroy the South Manchurian railway bridge.

The Manchurian railway zone and the treaty district were cleared of Chinese police and Japanese troops and police were protecting Japanese residents and foreigners.

Japanese reinforcements were ordered concentrated at Mukden from various towns along the Manchurian railway.

National Government Must Remain In Power To Stabilize Credit

London, Eng.—The London Daily Mail says that the board of governors of the Bank of England have taken the "unprecedented step" of visiting the House of Commons to inform the Prime Minister that the National Government must remain in power at least two years if a heavy fall in exchange is to be averted.

The Mail for several days has been conducting an energetic campaign against the Conservative proposals for an early general election. Its story was published under heavy headlines.

"The affairs of the nation reached a position of extreme gravity Thursday, September 17," it said. "Information was conveyed to the government from the city (London's financial centre), that a precarious exchange situation exists . . . and it would appear on reports thus conveyed to the government that the recent unrest in the fleet had a profound effect on British credit and that the time has come when all other considerations save those of national existence must be put aside."

The board of governors of the bank, the paper said, asked the government to make a definite announcement that there would be no general election and that the government would remain in power for its full possible term of two years. It said that the board gave Premier Ramsay MacDonald "an alarming estimate" of the amount of fall in exchange which would follow any announcement that an election had been decided upon.

The Mail added that the cabinet met until a late hour and that Mr. MacDonald asked the members to come to a definite decision for or against an election.

Talk of a general election soon has been growing stronger during the past week and there was a widespread conviction in the parliament lobbies that it would take place the last week in October or early in November, when an appeal to the electors would be made by the National Government, headed by Mr. MacDonald, and not by parties.

It was believed in the lobbies that Mr. MacDonald would be willing to head such an appeal and it was said that doubts about the wisdom of an early election were held only by the Liberals and were regarded as based upon that party's hostility to a tariff policy.

To the millions of Canadians who had the good fortune to witness the British air monarch, R-100, in flight over Eastern Canada following her Atlantic trip a year ago, the news that she is to be scrapped as part of the "Mother of Parliaments" "strict economy" plan, will be accepted with great regret. It seems a pity after spending more than \$2,000,000 in her construction, that the British Air Ministry have to make such a drastic move. Above are two familiar pictures, taken in Montreal, showing the giant dirigible anchored to the airship mast at St. Hubert, and a close-up of the cat-walk by which passengers and crew board the airship.

NOTES AND COMMENTS

Roger Babson's inflated reputation as a statistician has been exploded. Since the depression commenced he reiterated that "prosperity is just around the corner." Now he says we have a surplus in everything except "spirit." A prominent banker says the only way in which normal times will assert themselves is by the old-fashioned law of supply and demand.

Artificial aids to promote so-called prosperity are as all other artificialities. You cannot substitute for the real thing. This depression will end when we have become accustomed to a less frenzied mode of living; when people are less inclined to mortgage the future for luxuries instead of paying for the necessities, and when the efficiency experts who have been so keen on saving money for those whom they work for turn their attention towards devising schemes which will entitle Labor to share in profits of industry on an equal footing with capital and management.

Mr. John Raymond Hall, president of a corporation for financial and industrial counsel, states: "Such a concept could be put into practical effect through the establishment of reserves for labor from surplus profits just as is now done for owners and managers of industry."

In the meantime all these suggestions and advice are just so much "blah." Human nature being what it is, none of these suggested remedies will ever be put into effect. Selfishness in human nature will prevail, and the law of the survival of the fittest will assert itself, equally as much as the law of supply and demand. They are immutable natural laws which man cannot overcome. The best advice we can offer is to try and make every hour count for something constructive, even though it may not produce money.

Gold, an inanimate metal, the idol of the miser and the usurer, a commodity which has neither soul nor sentiment, has indirectly caused much of the distress which unemployed throughout the world are suffering from. Set up as the standard of exchange between most countries of the world, France and the United States have been accumulating such vast reserves that Great Britain has been shorted in its gold reserves until those countries could dictate to Great Britain what value they would place on the pound sterling, nominally worth \$4.86 in the States.

It meant that Great Britain's exports were being paid for by other countries at a below par value based on home manufacturing costs. A continuation of business on these lines would eventually have meant national insolvency. To meet such a crisis, extraordinary measures had to be taken. Accordingly silver will again be recognized as a standard medium of exchange by Great Britain. Many years ago the late William Jennings Bryan, democratic candidate for the presidency of the United States, fought his campaign on the issue of silver as the coinage of the United States, stating the gold standard would crucify the people. It almost did that for the people of Great Britain, and in turn it would have crucified the people of the United States and Canada.

Summer activities linger on, despite the fact that fall and winter activities have commenced. Cold wet weather has no terrors for the fishing enthusiasts, while the tennis enthusiasts push old man winter to one side with a laugh of scorn and continue playing on the local courts as merrily as in mid-summer. Youth will have its fling, in all seasons and weathers.

A man is only as old as his outlook or mental attitude may make him. Some are old at 40, others remain young till 80 or until they are suddenly called home. Happiness consists not in counting wealth by the money you may have saved, or the worldly possessions you consider your own; but in the ability to enjoy the commonplace things of life, regarding your daily duties as a pleasure, and in maintaining a cheerful attitude no matter how dark the clouds may be.

It causes us to smile when we remember a year ago last July someone asked Joe D. Matheson, Conservative candidate at that time for the Federal government, what his remedy was for unemployment. Joe naively replied, "Why, work!" Not a soul followed the question up by asking him how he would provide the work, for which possibly Joe was secretly thankful, as that problem yet remains unsolved.

If one home industry fails to support another, and to save money sends its cash elsewhere, it indirectly helps to curtail its own revenue, through subsequent lack of business in its own community. Seemingly wise business men often ignore this phase of business.

Here and There

Ontario gold production for the half year to June 30 reached \$20,000,000, the greatest on record. Indications are that the output for the full year 1931 will be well over \$41,000,000 in value.

Working at the rate of a mile a day and employing a daily average of 450 men, completion of rockballasting in the Ontario district from Windsor to Smiths Falls on the Canadian Pacific tracks was announced recently.

Canadian hens are working much harder than their ancestors of ten years ago. In 1920, statistics show that 5010 birds produced an average of 123.1 eggs apiece. This average rose steadily until in 1930 it was 175 eggs per bird.

New Brunswick moose and deer will make their debut, on the talkie screen this Fall while the famous moose calls of the Brunswick guides will be recorded in sound for the edification of millions of patrons in thousands of theatres across the continent.

The site of the first cheese factory in Canada, located in Oxford County, Ontario, will be marked with a cairn as an historic site. There are now more than 2,500 factories in Canada making butter or cheese, and the cheese production exceeds 150,000,000 pounds yearly.

"Generally satisfactory" is the comment on wheat grading in the Prairie Provinces, according to reports coming in from the Agricultural Department of the Canadian Pacific Railway at Winnipeg. Wheat cutting in the West was virtually completed by the middle of September and rather more than half of it was threshed at that time.

Playing spectacular golf, F. G. Hoblitzel, of the Lambeau Club, Toronto, defeated Philip Parkey, Ontario amateur champion, in the finals of the Prince of Wales Trophy, played at the Banff Springs Golf Course in September. Sixteen players from all over Canada and the United States, qualified for the title fight.

Award of three scholarships at McGill University to minor sons of Canadian Pacific employees has been made to M. M. Madge, D. K. Gowans and Keith W. Shaw. The scholarships provide for five years' tuition in architecture and chemical engineering, all fees being met until the recipients have taken their degrees as Bachelors of Science.

"We are coming to realize that most of our national problems have an international background and can only be solved by international co-operation," declared Hon. Vincent Massey, former Canadian Minister at Washington when sailing recently on the Empress of Canada at the head of the Canadian delegation to the forthcoming conference of the Institute of Pacific Relations at Hangchow, China.

Richness Of Mineral Fields In Great Bear Lake Area Are Stated To Exceed Cobalt

Confirmation of the sensational richness of the mineral fields on Great Bear Lake was given by Robert J. Jowsey, prominent Toronto mining man and prominent in the Sherritt-Gordon Corporation, who recently returned by aeroplane from the north. Although reticent, Mr. Jowsey admitted that he had "never before seen such an abundance of mineral stains in one area in a lifetime of mining."

Mr. Jowsey, who was one of the pioneers in Cobalt, declared that owing to the entire country being composed of high ridges in which the mineral lies, mining will be comparatively simple.

"Where it cost \$50,000 to get a plant going in the Cobalt, one with four times the capacity can be set up on Great Bear Lake for \$5,000 to \$10,000."

Discussing the question of production and smelting, Mr. Jowsey expressed the view that there would be no difficulty in smelting the silver when it is mined. The proximity of oil at Fort Norman will greatly assist the Great Bear development, Mr. Jowsey believes.

"In all my experience in mining, and I've had plenty years of it, never have I seen anything to compare with Great Bear," said Mr. Jowsey.

"The copper vein, I think, the largest and richest in the world. Some of the silver lodes are so rich and virgin that they can be shipped to the smelter and melted to bar silver without any refining," said Mr. Jowsey.

In the present instance Mr. Jowsey is not acting for the Sherritt-Gordon, but went into Bear Lake independently.

He proposes to do development work this winter and will send in gangs of men to Great Bear to probe the seven claims he staked on this trip.

"I should estimate," he said, "that there are close to 2,000 claims staked already and every day new claims loaded with prospectors arriving to stake. I hope that I threw my stakes into a couple of million dollars worth of silver, but I can't tell yet."

He was smiling statement. He did, however, say that Ventures, Dominion Explorers, Sherritt-Gordon, Manitoba Basin, N.A.M.E. and Consolidated Smelters and Miners had sunk a few holes and on the strength of the findings were each leaving men on the claims for development during the winter.

Questioned on the radium situation, he said: "I saw a lot of stuff which they said was radium, but whether it was worth a million, a ton or \$3 a ton I couldn't tell. I don't know radium."

"But I do know copper and silver and what I saw showed me that at Great Bear is the largest and richest run of pay-ore veins in the world. Even if the radium only pans out to a dollar a ton, millions will be made from the copper and silver. So abundant is it that it sticks out of the rock on the lake shore and extends back into the coppermine area."

According to information there are only three mining camps established so far. LaBee has one at Hunter and Echo Bay each, while the Dominion Explorers have one at Glacier Bay.

"Right now," he said, "only the large eastern mining concerns realize the untold wealth of the area. The general public does not seem to know just how heavily the land is mineralized. It will be a repetition of the affair at Cobalt in 1904 when lands there were sold for a song to the mining corporations. Great Bear will make the Cobalt field look like a piker."

Treatment Was a Success
"Do you guarantee results in your nerve treatment?" asked the enquirer.

Specialist: "I do. Why, a man came to me for nerve treatment, and when I had finished with him he tried to borrow fifty pounds."

A New Jersey man boasts of having carried the same umbrella for fifty-two years. However, the man who owns it may catch him yet.

If you go into the cage again and make the lion wild, I will set the dog on you.—Muskeete, Vienna.

National Wealth Of Canada According To Latest Estimates Is Placed At High Figure

Just Like Human Beings

Among Millions Of Hens No Two Alike Says Expert Poultryman

To most persons a chicken is just a chicken minus any characteristics which distinguish it from any other chicken, aside from the obvious differences in breeds. But to E. C. Foreman of Lowell, Michigan, each chicken is an individual. In fact, he says a hen has a social consciousness, a cosmic urge, and can be just as temperamental as the female of the human species.

For six years he was in charge of the poultry department of Michigan State College and then served as head of the poultry department for two years. Six years ago he came to Lowell and started a poultry farm. "Every hen," according to Mr. Foreman, "has just as many characteristics as a human being. Among all the millions of hens in the world no two are alike."

"Chickens," he continues, "fall into three classifications. Out of every hundred approximately 10 are superlatively good and 30 are culls. That, I think, is about the same percentage as among human beings. The 10 per cent. has beauty and character and intelligence. It is keen and alert and aggressive."

Manitoba Community Farm

Plans For Providing Employment For 1,000 Persons Are Under way

Plans for a community farm employing eventually 1,000 persons were announced in Winnipeg when it was announced that a five-year lease of the 2,000-acre Manitoba Government Farm, 76 miles northeast of Winnipeg, would likely be granted.

The Imperial Immigration League of Manitoba, negotiating with the Provincial Government for the lease, purposes to convert the farm into a self-sustaining community where married men and their families will have the opportunity of making a living. Fifty families, preferably from Winnipeg, will be given immediate employment there. The scheme is designed to relieve unemployment and the city council will be requested to co-operate by allowing \$350 to each man.

Foresees Great Speed

Prediction that the speed boats might attain a speed of 1,000 miles an hour in 25 years was made by Kaye Don, holder of the present world's record of 110 miles an hour, speaking at the Empire Club luncheon in Toronto. If progress in development of racing boats continued at the same rate as during the past quarter century, he thought this might be possible.

Young Lady: "I see you advertise 'Purs altered.'"

Shopman: "Yes, miss, that is so."

Young Lady: "Very good. I'll send round my squirrel suit and have it made into a sealskin."

Just a Misprint

A compositor, out of work, secured a job as a waiter.

One of the first customers whom he served with soup called him back and said:

"Waiter, there's a button in this soup."

"Very sorry, sir," replied the waiter. "Printer's error. Should be nut-ton."

"How did your article on perpetual motion turn out?" "Oh, it was a great success," said the author.

"Every time I sent it out it came back to me."

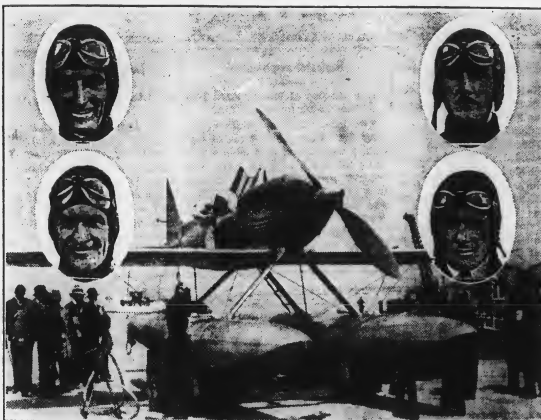

Aeroplane passenger service will be established in China from Shanghai to the Siberian border, where it will connect with a Soviet service to Europe.

Mechanical food service which was installed by a small restaurant in London has not proved popular.

"What! 15 shillings for that simple meal! Are chickens so scarce?"

"No, but customers are."—Hummel, Hamburg.

BRITISH SCHNEIDER CUP PILOTS RACE AGAINST EACH OTHER

Flight Lieutenant G. H. Stainforth set a new world's speed record of 386.1 miles an hour in a seaplane over a three-kilometer course at Calshot, England.

Great Britain also won permanent possession of the Schneider cup when Flight Lieutenant J. N. Boothman flew another seaplane 217 miles at an average speed of 340.06 miles an hour over a 31-mile course.

While Lieutenant Stainforth's speed remained to be checked and verified by the International Aeronautical Federation, it officially was announced that he had beaten by more than 28 miles an hour the previous world's speed record of 357.7 miles an hour, set by Squadron Leader A. H. Orlebar, in 1929.

Lieutenant Stainforth's speed over the second of four laps was 404.26 miles an hour. This new record for the distance verified predictions that a British plane would pass the 400 mark.

With the performance of Lieut. Boothman, Great Britain took the Schneider trophy permanently, having won the two previous Schneider cup races. The cup was presented by the late Jacques Schneider, French sportsman, for international competition. Inset are four of the five daredevils who participated in the race. Top, left and right: Squadron Leader Orlebar, previous holder of the world's record, 357 miles per hour; and Flight-Lieut. Stainforth. Below, left and right: Flight-Lieut. Long, and Flight-Lieut. Boothman.

How To Increase Clover Seed Yield

Harvest First Crop When Plants Coming To Bloom

The yield of red clover seed can be increased by cutting the first crop when the plants are coming into bloom, rather than later, according to the Ohio experiment station. Cutting the hay crop early, so as to give the second or shed crop a good chance, is the one important factor in increasing yield which is within the grower's control. Important factors beyond his control are favourable weather and plenty of bumblebees or other pollinating insects. Early cut hay is more difficult to cure and the yield is somewhat less than later cut hay, but the feeding value per ton is greater than that of more mature hay.

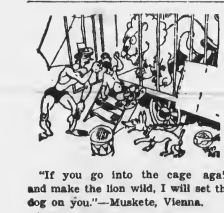

Result Of Wheat Test

Shows Protein Content Of Manitoba Crops Higher Than Yea

Dr. F. J. Birchard of the Canadian Board of Grain Commissioners, in a test made for protein content in the wheat crop of Manitoba, shows that the wheat crop of the province has a maximum of 18.3 per cent. against a maximum of 14.5 per cent. last year and a minimum of 10.2 per cent. this year as compared with 8.4 per cent. last; the average being 12.25 per cent. against 11.6 per cent. in 1930. The test grains were taken from the same districts as last year.

A man's temper improves the more he doesn't use it.

Lumber seems to pay best when treated as a farm crop.

Personal and Local

Mrs. J. Griffiths is spending two weeks visit with relatives in Lethbridge.

Many here will be interested to hear that James M. Brennan, who managed the junior hockey team, is to be married on Monday next in Vancouver, to Florence Beatrice, daughter of Mr. and Mrs. George Easterbrook.

Miss Margaret Allan returned this week to university at Edmonton, to commence her second year of studies, after spending the summer vacation at her home.

Mr. Melville Anderson, of Anderson & McLean, sight specialists, of Calgary, announces next visit to G. R. Powell's, Coleman, Tuesday, Oct. 6th 20 years experience and regular visits assures you of satisfaction in all optical work.

Palace theatre resumed nightly shows on Monday, after several weeks of running for the latter half of the week.

Mr. and Mrs. Wilfrid Dutil returned on Monday from their honeymoon trip to the coast, and will make their home here.

Dr. D. A. McLeod's office is now open at the regular hours, and appointments for dentistry may be made by telephoning 121.

Mr. J. D. Moir left on Tuesday evening for his home at Little Woody, Sask., after spending two months with his daughter, Mrs. H. T. Halliwell.

Several of the Coleman visitors to the Masonic meeting at Kimberley stayed at McKinnon's hotel and state they enjoyed their visit very much.

G. Pattinson and G. E. Cruickshank, M. L. A., motored from Kimberley to Calgary following the Kimberley meeting on Saturday, returning on Tuesday via Macleod.

Young ladies from Coleman who commenced this week at Alberta University are Adele Whiteside, Ruth Morrison, Gwen Brown and Belle Flynn.

The equipment of Coleman Bakery was moved out on Tuesday, and shipped to Lethbridge. Frank Celli, owner of the store, has not yet decided what purpose it will be used for, but states he contemplates opening some line of business there. The bakery business is now being catered to almost entirely by Belle vue Bakery.

At Creston exhibition held last week, Mr. Alex. Cameron, of Coleman, was awarded first prize for his exhibit of Delicious apples grown on his fruit farm at Creston. As he expresses it, "not so bad for an amateur greenhorn like myself." He spends the summer months there, and during the winter lives in Coleman.

Mr. and Mrs. D. O. Macko are away on two weeks holidays.

Mrs. J. Wood of New Denver, B. C., is visiting her daughter, Mrs. Sist, and was accompanied home by her grand daughter, Joan, who has been spending the summer at New Denver.

Albert and Sidney Short, Adam McIntock and Maurice W. Cooke spent the week end at North Fork fishing, and report very fair catches. They did not see any other cars in there.

Edward Wood rises to inform The Journal that the peonies at the town hall garden did bloom during the summer, despite the report last week stating they were the only flowers that did not bloom. Edward must be right, for he helped to water the garden.

Belle Flynn, one of last year's Grade 12 students at Coleman high school, this week commences her first year at Alberta university. She made a fine record in her exams here, and her many school friends wish her success in her university studies.

Mr. and Mrs. J. M. Allan motored to Calgary, their daughter Margaret accompanying them on her way to university at Edmonton. Miss Menzies, of Rocky Mountain House, sister of Mrs. Allan, will return with them for a visit.

It is probable that the Boy Scouts of the Crows Nest Pass will be represented at the next World Jamboree. It is to be held in 1933 at Buda Pesth, Hungary. Interest is already quite keen in the event. Such a trip would furnish a valuable and interesting experience for any boy.

Mrs. T. B. Smith will leave Sunday for a two months stay in California. At Calgary she meets Miss Ella Markinaki, secretary to Vice President D. C. Coleman, of the C. P. R., Winnipeg, who is spending a month with Mrs. Smith in California, and who accompanied Mrs. Smith on her trip to Europe in 1928.

Masonic Lodges of Hillcrest, Blairmore and Coleman were represented at the gathering at Kimberley on Saturday. Windermere, Invermere, Cranbrook and other lodges were represented. Those attending from Coleman were R. Laslett, J. Ford, J. Houghton, A. Jackson, J. Park, J. O. C. McDonald and J. Emmerson. On Sunday morning the party were taken for a tour of the Sullivan mine and concentrator, which proved very interesting.

BREAD!

Do you eat it for lunch with fresh fruit and milk?
Or do you eat other less nourishing foods?

The way you feel is a matter of the kind of food you eat.
Natural foods are the best.
Bread is nourishing.
Bread with milk and fruit is delicious.

Eat right and feel right.
Bread is your Best Food—Eat more of it.

Charlie Makin was seen marching off with a gun and a haversack. So formidable was his stride, that one immediately came to the conclusion he must be out after big game. When he said he was going rabbit shooting, it caused quite a feeling of disappointment, dispelling imaginative thoughts that Charlie would be marching home with a bearskin.

The dance held last Thursday evening by Summit Lodge, A. F. & A. M., was attended by quite a large number of members also members of the Eastern Star. The musical portion of the program was contributed to by Gwen Brown, Mr. Hibbert, Reuben Johnson and a cornet solo by George Vincent. Mason's orchestra furnished the music for the dance program.
